

Incuwater-Clean

Disinfectant solution for incubators in cell culture and molecular biology laboratories

Product No. OJ10438.0100

Description

The water required to create the humidity inside an incubator is a constant source of contamination. Incuwater-Clean contains an effective disinfectant which prevents microbial and fungal growth and does not cause damage to the stainless steel or copper trays in the incubator. Incuwater-Clean is non-toxic, non-volatile. Incuwater-Clean is supplied as a 100X concentrated ready-to-use-solution (100 ml).

For preventing microbial and fungal growth in standard water baths, use Aquabator-Clean (Product No. OJ18780).

Recommended use

Add the required amount of sterile water to the incubator water tray, add 50 ml of Incuwater-Clean per 5 liters of water. Replace water every 2-4 weeks.

Storage: 2-8°C

Stability: min. 3 years

Related products

Incubator-Clean

Product No. OJ10460

Incubator-Clean solution can be used to clean incubators. It prevents the growth of fungi (and spores), molds, bacteria, mycoplasma and viruses (including HIV and Hepatitis B). The active ingredients are quaternary benzylammonium compounds and the solution does not contain mercury, formaldehyde, phenol or alcohol. Incubator-Clean is non-toxic and biodegradable. It is also compatible with standard work surfaces (e. g. aluminium, tin plated iron, chrome, nickel steel, high grade steel and copper, polycarbonate). Incubator-Clean is a sterile filtered solution supplied in a spray bottle.

Aquabator-Clean (100X)

Product No. OJ18780

Aquabator-Clean is intended for preventing growth of bacteria and fungi in water baths. No foam is produced when using the Aquabator-Clean with circulating water baths. It is heat-stable up to 100°C.
