

Incubator-Clean

Disinfectant solution for incubators and sterile benches in cell culture and molecular biology laboratories

Product No. OJ10460

Description

Incubator-Clean solution prevents the growth of fungi (and spores), molds, bacteria, mycoplasma and viruses (including HIV and Hepatitis B) on surfaces inside incubators. The active ingredients are quaternary benzylammonium compounds, and the solution does not contain mercury, formaldehyde, phenol or alcohol. Furthermore, Incubator-Clean is non-toxic and biodegradable. It is fully compatible with common work surfaces (e. g. aluminium, tin plated iron, chrome, nickel steel, high grade steel and copper, polycarbonate). Incubator-Clean is a sterile filtered solution supplied in a 500 ml spray bottle.

Storage: Room temperature

Stability: min. 3 years

Recommended use

Incubators: Spray incubators once every 2 weeks. It is not necessary to empty the incubator before spraying.

Sterile benches: Spray sterile benches once a day, or preferably before using the work area.

Related products

Incuwater-Clean

Product No. OJ10438

Incuwater-Clean contains an effective disinfectant which prevents microbial and fungal growth and does not cause damage to the stainless steel or copper trays in the incubator. Incuwater-Clean is non-toxic, non-volatile. Incuwater-Clean is supplied as a 100X concentrated ready-to-use-solution (100 ml).

Aquabator-Clean (100X)

Product No. OJ18780

Aquabator-Clean is intended for preventing growth of bacteria and fungi in water baths. No foam is produced when using the Aquabator-Clean with circulating water baths. It is heat-stable up to 100°C.
