

The most quoted transfection reagents

Lipofectamine® reagent

The original transfection reagent that performs well on common cell types and can be used in conjunction with Plus reagent to delivery higher protein expression.

Quote promotional code **P827665** when ordering 2 or more units of the Lipofectamine® Transfection Reagent, 1 mL or 4 mL pack size, to get **30% off** list price*.

Description	Cat. No.
Lipofectamine® Transfection Reagent, 1 mL	18324012
Lipofectamine® Transfection Reagent, 4 mL	18324020

Lipofectamine® 2000 LTX and RNAiMAX reagents

Discover the highest performance for DNA (Lipofectamine® LTX reagent) and siRNA (Lipofectamine® RNAiMAX reagent) lipid transfection.

Lipofectamine® 2000 reagent

Lipofectamine® 2000 reagent is the most cited reagent available on the market.

- Fast —Proven to work in high-throughput applications
- Reproducible —Reliable reagent for establishing stable cell lines
- Sensitive —Proven efficacy in the presence of serum-eliminates the need to change media following transfection
- Convenient —High efficiency co-transfection with plasmid DNA and siRNA

Quote promotional code **P827665** when ordering 2 or more units of the Lipofectamine® 2000 Transfection Reagent, 0.75 mL or 1.5 mL pack size, to get **20% off** list price*.

Description	Cat. No.
Lipofectamine® 2000 Transfection Reagent, 0.75 mL	11668027
Lipofectamine® 2000 Transfection Reagent, 1.5 mL	11668019
