

CLICK PRINT LOVE

from sample to high-quality images in just a few clicks

The FLoid™ Cell Imaging station is that easy.

Designed in collaboration with fluorescence microscopy users, the FLoid™ Cell Imaging Station captures high-quality, three colour fluorescent cell images right at your benchtop, with an interface so simple even novice users can collect data in as little as two clicks of the mouse.

Test drive the user interface of the FLoid™ Cell Imaging Station at www.lifetechnologies.com/floid

- Simple —Collect images in no time with intuitive user interface
- Practical —Print cell images and stick them in your notebook
- Accessible —Capture fluorescent cell images on your bench, not in the darkroom
- Robust —Protect expensive confocal microscopes from excessive day to day use
- Informative — Find the most popular Molecular Probes® reagents

Free FLoid™ Printer and Molecular Probes® Handbook when you buy the FLoid™ Cell Imaging Station at this introductory price until 31/3/2012.
