

EU-Origin Fetal Bovine Serum

Sourced in Europe. Filtered in Europe. Delivered in Europe.

In an environment where transparency, origin, and regulatory compliance are key priorities, Biowest offers a fetal bovine serum that is 100% European — perfectly aligned with the expectations of laboratories seeking traceable, ethical, and regionally compliant solutions.

Benefits of Biowest FBS EU origin for you:

- Controlled geographic origin: France, Spain, Ireland, Italy, the Netherlands
- Triple sterile filtration at 0.1 μm , performed in France
- Certificate of Analysis provided with every batch
- Ethical and sustainable approach, with reduced logistical footprint

FBS Europe delivers the same high-level performance as leading South American and international-grade products — with the added assurance of full compliance with the strict European standards on origin, traceability, and safety.

Replenish your FBS supply and save money!

Buy multiple bottles of European origin FBS and receive one of the following discounts:

Who is Biowest?

Since 1987, Biowest has been supporting academic, biotech, and pharmaceutical laboratories around the world with its recognized expertise in cell culture serum production.

Headquartered in France and present in more than 100 countries, the company relies on a robust quality system, with ISO-certified production facilities.

Biowest applies strict procedures aligned with industry best practices to ensure consistent quality. With full traceability from raw material sourcing to final delivery, Biowest provides a reliable, compliant, and ready-to-use solution tailored to the needs of regulated environments.

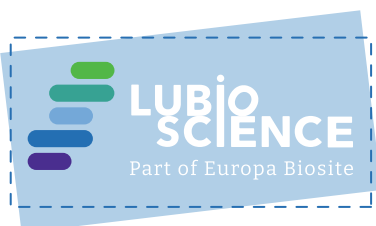

Controlled quality from origin to delivery

- Certified to ISO 9001 and ISO 13485
- Rigorous batch testing: mycoplasma, endotoxins, cell viability, hemoglobin, and virus-specific screening (e.g., BVDV)
- Comprehensive Certificates of Analysis (CoA) provided for every lot
- Full traceability from raw material sourcing to final product delivery
- Member of the European Serum Products Association (ESPA), committed to ethical sourcing and regulatory compliance within the EU framework
- Listed supplier recognized by the EDQM, meeting the quality expectations for raw materials used in regulated environments

Samples available

Want to test a specific lot before purchase? We offer free 50 ml samples! During your tests, the respective lot will be reserved exclusively for you for 4 weeks, so you can purchase the lot afterwards if it worked for you.
