

## DNA and RNA oligos

Error-free. Tons of modifications. Delivered within 2-3 days.  
From IDT - the industry leader in DNA synthesis. Why go for anything less?

## Synthetic genes

125 - 3000 bp. Sequence verified.  
Ideal for gene assembly, qPCR controls, library construction and CRISPR.

# GENOMICS? WE'VE GOT YOU COVERED.

## CRISPR-Cas9

Try out our CRISPR starter kit - all reagents you need  
for a complete genome editing experiment.

**FREE  
SHIPPING**

## qPCR Probes and Assays

Less background & increased signal and sensitivity due to ZEN double-  
quenched probes. MIQE compliant: all primer and probe sequences provided.

## DNA and RNA oligos

- Proprietary synthesis platform ensures >99% coupling efficiency
- Highest percentage of full-length oligos in industry
- Every oligo fully QC'd by ESI-MS

### QUOTE „TryIDTOligos“

to receive up to 10 free oligos  
(25 nmole scale, desalted,  
no modification)\*

### QUOTE „TryIDTBlocks“

to receive one gBlock  
up to 500 bp for free\*

## Synthetic genes

- Double stranded DNA fragments, 125 - 3000 bp
- Completely sequence-verified
- Fast turnaround times

## CRISPR-Cas9

- All reagents for a complete gene editing experiment
- 2 crRNA, tracrRNA, Cas9 protein, controls, HDR donor blocks & HDR enhancer V2

### QUOTE „StartCRISPR“

and receive 5% off your  
first CRISPR starter kit\*

### QUOTE „MINIME“

to receive a free predesigned  
mini qPCR assay (100 rxns)\*

## qPCR Probes and Assays

- Predesigned assays for human, mouse, rat
- Custom design tool
- Assays priced at less than half of competitors' assays
