## **LubioScience announces new Custom Services Offering**

LubioScience GmbH, Switzerland's leading distributor and Life Sciences platform, has announced today the establishment of a new custom services portfolio. The offering is meant to facilitate outsourcing and custom manufacturing for Biotech companies, Start-ups, Pharma companies and Academic institutions.

LubioScience relies on its network of trusted service providers to offer tailored custom projects with fast turnaround times and personal project support. The complete range of custom services is also available via Scientist.com.

Custom services include antibody discovery and production, recombinant protein expression, peptide synthesis and labelling, bulk oligo production, gene synthesis, cell line development, next generation sequencing and custom assay development.

Clients profit from full project support by a Swiss partner, a choice of multiple service options, flexible payment terms and scalable project layouts.

"We're excited to launch our custom services offering to help researchers advance their projects and to reduce time to results. We have established an extensive consulting expertise for complex custom services with the aim of offering quick, unbiased and personal consultation to our clients." says Dr. Muriel Revol, Director of Custom Services.

## **About LubioScience**

LubioScience is Switzerland's fastest growing Life Sciences distributor. Their portfolio covers over 4 million products from more than 100 suppliers, including the largest portfolio of antibodies, proteins and assays kits in Switzerland. LubioScience is proud to be a carbon neutral company and we compensate our full carbon footprint by investing in reforestation projects in Central Africa. LubioScience is a preferred supplier of the Swiss Biotech Association and a member of the [Pivotal Scientific Limited Alliance](#) and the [European Bioscience Network](#).
